Online Assignment-2020

Class Five

Subject : English

Time: 2 Hours

Full Marks : 50

Read the given text carefully and answer the questions no: (1-4)

Sometimes the food we like to eat isn't the healthiest food for us. The food pyramid helps us to understand the different food groups, and it tells us how much of each food group we should eat. Rice, ruti and bread are made from grain. Potatoes are not grains but they are similar. Grains give us energy. Fruit and vegetables are also very important for us . they have vitamins. They help our eyes and our health. On the next level. There are fish, meat, dairy products, beans and lentils. Meat, fish and chicken have protein. Beans and lentils do, too! Dairy products are things like milk and eggs. They help our teeth and bones. Protein and dairy make us strong. Fat and oil are at the top of the Food Pyramid. These make food delicious, but our body does not need very much of them. When we have choices about food , we need to make good choices.

1. Match the words of the Column A with their meaning that is mentioned in the text in the Column B.

1×5=5

Column A	Column B
(a)Vitamins	(i) made from milk.
(b)Dairy	(ii) having great physical power.
(3)Protein	(iii) a natural element found in food
(d)Choice	(iv) a natural element found in meat, fish and eggs.
(e)Strong	(v) an act of choosing.
	(vi) require.
